

XDATA API SERVER

- Build a Windows or Linux REST API server with Delphi and XData in minutes
- Publish all your database data automatically in REST endpoints with a few lines of code
- Easy JSON serialization and database access
- Full query syntax for retrieving entities through the API

ORM AND DATABASE DEVELOPMENT

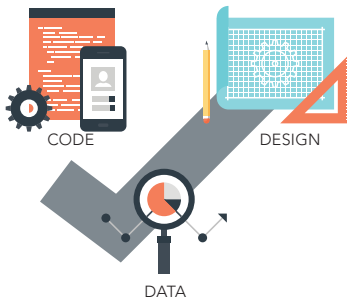

Aurelius: State-of-the-art ORM framework for Delphi

- Abstract your database in objects:
focus on business logic instead of persistence mechanism

Data Modeler: Visual database design tool

- Reverse engineering of existing database
- Easy-to-use ER Diagrams

QUALITY ENTERPRISE SOFTWARE TOOLS

- **Scripter:** Add ultimate end-user customization to your application
- **Workflow:** Design and run business processes with task management
- **Diagram Studio:** Visual diagram/flowchart component
- **Query:** Make queries easy, flexible & powerful
- **Echo:** Automatic data replication

FNC

COMPONENTS

develop.fnc

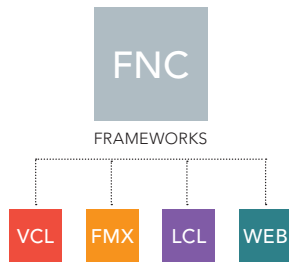

use one code base everywhere

CROSS-PLATFORM & CROSS-FRAMEWORK

Framework Neutral Components mean:

- Only one UI control and REST API access set
- Only one learning curve
- Only one license
- Freedom of choice to target Windows, macOS, Android, iOS, Linux and Web
- Freedom of choice to use VCL, FMX, LCL, TMS WEB

REUSE SINGLE CODEBASE

- Use 100% identical Delphi UI logic code in VCL, FMX, LCL or TMS WEB apps
- One control set for VCL, FMX, LCL, TMS WEB frameworks
- Abstraction layer to write your UI control code framework-independent
- Components with 100% identical interface and look & feel in all frameworks and all platforms
- Abstraction layer to write reusable cross-platform REST API access code

QUALITY SET OF COMPONENTS

One solid code base for complex and feature-rich components:

- Grid
- Planner
- RichEditor
- Treeview
- Ribbon
- REST API access to Google, Microsoft, PayPal, Dropbox, ...
- And more...

TMS FNC Component Studio Subscription includes:	€ 395	€ 695	€ 1295

WEB

TMS WEB CORE

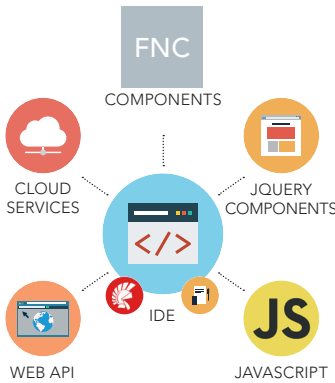

develop•web

framework for creating modern web applications

RADICAL WEB

- Modern SPA web application model
- Pure HTML5/CSS3/JavaScript based applications
- Component framework for UI controls and access to browser features
- Debugging in Pascal code via the browser
- Backed by a solid & proven Delphi Pascal to JavaScript compiler
- Ready for progressive web applications
- Ready for Electron based cross-platform desktop applications

REUSE SKILLS AND COMPONENTS

- Component based RAD development integrated in the Delphi IDE
- A truly revolutionary & innovative TMS FNC component framework allowing to create UI controls that can be used on VCL, FMX, LCL and WEB!
- Open to consume other existing JavaScript frameworks & libraries.
- Open to use other jQuery controls
- Offers Pascal class wrappers for jQuery controls from the jQWidgets library
- Easy interfacing to REST cloud services including to TMS XData for database

EASY DEPLOYMENT

- Application consists of HTML & JavaScript files only that can be easily deployed on any webserver
- Use any existing load-balancing software and/or techniques for highest performance
- Small debug webserver is included for fast RAD development

VCL

COMPONENTS

develop.vcl
accelerate your Windows development

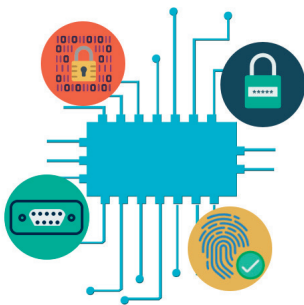

USER INTERFACE CONTROLS

- **TMS VCL UI Pack** Large set of powerful, flexible and feature-rich VCL UI controls
- **TMS VCL Chart** Multipane chart for business, statistical and financial data
- **TMS VCL Mapping components** Google Maps & Openstreet Maps geographical mapping solutions
- **TMS VCL Instrumentation Workshop** UI controls for measurement, instrumentation and machine control software
- **TMS VCL Diagram Studio** Diagram & flowchart functionality with MS Vision like interface

COMMUNICATION

- **TMS VCL Cloud Pack** Seamless access to wide range of popular cloud services
- **TMS MQTT** Library to make use of MQTT messaging easy
- **TMS Async** Fast and light-weight asynchronous serial communication library

APPLICATION LOGIC

- **TMS VCL Security System** User-rights management system
- **TMS VCL Plugin Framework** Modular application design framework
- **TMS Cryptography Pack** Library of various high-fidelity encryption, decryption, signing and hashing functions
- **TMS Scripter** Pascal or Basic language scripting engine + full IDE for runtime form design

TMS VCL Subscription includes:	€ 795	€ 1125	€ 2750
